At MakeMusic, our goal is to provide solutions to help enhance and expand how music is taught, learned, and prepared for performance. We share the belief that music is an essential part of human development.

We’ve created the Music Education Standards and Assessment website as a resource to support you in the area of standards development and music assessment. It includes details about the design and organization of state standards as well as valuable information about how the standards are assessed.

Compliments of MakeMusic, Inc.
New Resource for Music Education Standards and Assessment

Educators and administrators across the country are increasingly aware of the rising expectations surrounding the measurement and documentation of student achievement. However, the design, funding, and goals of arts assessment methodology vary widely at the state, the district, and sometimes even the school level.

In our role as a world leader in music technology, MakeMusic has been collaborating with educators and administrators to develop resources to support you in the area of music standards and assessment. These resources are now available at http://musicstandards.org.

In addition to providing an ongoing resource, this information will also be used to support the National Assessment Symposium, part of the NAfME Music Education Week in Baltimore, June 24-25. Your participation is encouraged. Go to http://musiced.nafme.org/events/national-symposium-on-music-assessment-and-teacher-evaluation/ to learn more.

Here’s some of what you’ll find at http://musicstandards.org:

We know that the Music Education Standards and Assessment website will prove to be valuable to the arts education community and will contribute to a better learning experience for our students.

We welcome your feedback. Reach us via the comments section on the website or at standards@makemusic.com.

Example of state-specific information:

MakeMusic, Inc. is the creator of SmartMusic interactive software. SmartMusic addresses evolving assessment standards and accountability requirements by providing technology tools that enable individualized instruction and document student achievement.
