

Forwarding CWU Email to Personal Email Address

Click the settings gear in the right hand corner--> Mail ---> forwarding ---> enable forwarding. From there you enter the email you would like it to be forwarded to and select to keep a copy of each message in your CWU account as well.

Check your spam folder in your gmail (or email client). Once you find the message, the following emails will go straight to your gmail inbox with no problem.

Here are some screenshots to show you what you should see when you change this setting.
